

Tips for Success

We Help You Grow For a quick video demonstrating how to care for your new Airplants, simply search "Air Plant Care & Styling with Devin Wallien" to find his informative videos online. Further information and growing tips can be found at RobertasUniqueGardens.com & QVC.com

Water Let your Air Plants soak in water for one hour every week. Allow them to fully dry on a towel before repositioning them in their location. If you notice your Air Plants are starting to brown or get curly, that means they need water.

Perfect Temperatures These easy to care for plants will do well in any location that is between 55F and 85F. You can keep them indoors or outdoors in a well lit location with bright diffused light. Refrain from placing them in the directly sunlight.

Designing with Airplants The options are endless when it comes to having fun with Air Plants. Place them in a decorative container on your desk or coffee table, hang them in a wired frame, allow them to dangle from some twine, place them on the soil of your other houseplants, or do whatever your heart desires. Wherever you place them, just make sure that they are accessible and easy to get to so that you can soak them each week. If placing them in a terrarium, just beware that they like air flow. Invite your friends over and have an Air Plant party - inspire one another and get creative with these low maintenance, fun plants!

Air Plants are the easiest of the easy! These plants require neither soil nor watering. They're the perfect plant to add to desks, coffee tables, mantles, or anywhere you want plant life without the risk getting things dirty. This collection includes three different hard to find varieties directly from our farm in Central America. A faux bois wooden log is included to display your Air Plants.

Roberta's Gardens PLANTING AND GROWING GUIDE

Air Plant Collection
Tillandsia spp.

We aren't happy if you aren't happy. If you have any questions regarding your order please call us at **1-765-525-4065** during the hours of 8:30 am and 4:30 pm EST.

You can email questions to us at: customerservice@robertasinc.com.

If your bulbs, cuttings, etc. do not sprout, or your plant dies within 90 days from the date of shipment, we will send you a replacement free of charge. We cannot accept responsibility for losses due to extreme weather or neglect. Simply call us at the above toll free number or fill out the plant replacement form on our website at RobertasUniqueGardens.com.

Roberta's will replace it with a similar or comparable plant at no charge. If your replacement is not available or it is too late in the season to ship, it will ship the following year.

Plant Caretaking

Upon Arrival Please take plants out of the box immediately and remove any shipping materials from around the plants. Soak them in water for 1 hour and allow to dry completely before positioning in the desired location.

Planting Depth & Spacing These plants do not need to be planted in soil to grow. They absorb water and nutrients through the scales on their leaves.

Potted Plants You may place them in decorative containers, but do not plant them in soil.

Watering Soak air plants in a large bowl of water for 1 hour, once a week. Tip: pick a day of the week to do this so that you can remember to soak them every week.

Fertilizer Once a month add a little bit of Roberta's Bounty to the bowl of water that you are soaking your Air Plants in. This will give them extra vigor.

Pet Considerations Ensure your pets do not consume plants. Some plants are toxic to pets. Do your diligence to protect your pet.

Drying Allow air plants to dry out on a towel for a few hours after soaking.

Planting Steps

Step 1 Remove plants from their box and take off other packing materials.

Step 2 Give Air Plants a nice soak in water for about 1 hour and allow to dry before placing in desired location.

Step 3 These plants do not need to be planted in soil to grow.

Step 4 Place Air Plants in a bright room that is well lit with plenty of windows. Get as creative as you desire when choosing where to place them in your home. They also do great outdoors as long as temperatures are above 55F.
