

Tips for Success

We Help You Grow: For a quick video demonstrating how to properly care for your new Geranium, simply search "Geranium Maintenance with Devin Wallien" to find his informative video online. Further information and growing tips can be found at RobertasUniqueGardens.com & QVC.com

Water: Water your plants immediately after taking them out of the box. Give them enough water so that the soil appears damp and water trickles out the bottom of the pot. Generally watering once a week for in ground plants and twice a week for container grown plants is sufficient during the heat of the summer.

Plants look Dry or Foliage appears Lackluster: Sometimes plants may appear dried out and wilted after the voyage. Do not despair. When this happens the foliage may look lackluster but the rootstock is still perfectly healthy and alive. To plump your plants back up, water them and wait 5 minutes and then water them again. This will generally rehydrate them. Keep these plants well-watered until you can re-plant them into larger containers or in the garden within the next week. If plants arrive dry, it is often because the roots have outgrown the small shipping pots and need more room to grow; roots tend to dry out quickly in small containers. Your plants are very much alive and when you transplant them into larger pots or the earth, they will start growing quickly! So, re-plant them as soon as possible. Remove any yellow or brown foliage.

Position Guide A - Bright Red, B - Pink with Eye, C -Violet

In the Ground or in Pots? Anyone can plant these in the ground. While typically classified as annuals, they are in fact tender perennials, meaning if you live where winters stay warm (above 40F) these will grow all year long. If you live where winters are cold but want to plant them in the ground, you can treat them as annuals and discard at the end of the season, or dig them up and pot them up to store them over winter. To winterize them, follow the instructions inside.

Candy Flowers Geranium True standouts, the Candy Flower Geranium brings some of the most strikingly colorful geranium to your patio containers, window boxes, and bedding. This series is known for its boldly colorful flower that seem to shine and glisten in the sun like drops of candy. They begin blooming early in the season and continue through autumn, nonstop! Includes Bright Red, Pink & Violet

Quick Reference

-  **Plant Type** Annual
-  **Light/Sun** Full Sun
-  **Mature Height** 12-18"
-  **Mature Spread** 12-18"
-  **Bloom Time** Summer to Fall
-  **USDA Hardiness Zones** 9 to 11

Plant Caretaking

Upon Arrival: Please take plants out of the box immediately and remove any shipping materials from around the plants. Give them some water and place them in a warm shaded area for 1-2 days before replanting.

Planting Depth & Spacing: Dig a deep enough hole so that the entire plant easily fits into the hole and the top of the soil line of your plant is flush with the top of the soil in the hole you have dug. It is important that the soil line of your plant does not protrude above the soil line in the ground or container. Space plants according to the mature spread of the plant as shown in the Quick Reference section. For instance if the mature spread is 12", space between 10-14" apart, depending on if you would like for the plants to lightly touch or be slightly separated.

Potted Plants: Make sure your container has holes to allow excess water to drain. You may pot one plant in a 8-12" container or place multiple in a larger container.

Soil Preparation: If you soil is clayish, amend it with standard potting mix to improve drainage.

Watering: To determine if your plant needs water, put your finger in the top of the soil and if the top inch is dry, it is time to water. It is important to make sure young plants do not experience long periods of dryness. However, they also do not like soggy conditions.

Fertilizer: Use Roberta's Bounty a couple weeks after planting and then once or twice a month all summer long.

Pet Considerations: Ensure your pets do not consume plants. Some plants are toxic to pets. Do your diligence to protect your pet.

Winter Care If you live where the winters dip below 35F, bring the containers inside the home, basement, shed, garage or anywhere else that will shelter your plants from the cold. Elevate them off the ground. During the winter, allow them to get very dry, watering no more than once a month or so. In the following spring, once the threat of frost is eliminated bring plants back outdoors. If you live where winters are warm, plants may continue blooming all winter long. Search online "Overwintering Geranium with Devin Wallien" for a quick tutorial.

Deadheading It is important to cut away old flowers in order to allow new ones to form. This will bring much more flowers to your plants.

Sunlight These will perform their absolute best in full sun conditions but can manage in a half sun area.

Planting Steps

Step 1 Remove plants from their box and take off other packing materials. Open your box outside or somewhere you don't mind getting messy, as some of the soil may have been shaken loose in transit.

Step 2 Check if your plant is thirsty. They probably need a nice drink of water after their voyage. If the plant feels light or the soil is dry to the touch, give your plants a watering.

Step 3 Allow your plants time to adjust to their new home before re-planting by placing them in a warm shaded spot for 1-2 days. Then they will be ready for re-planting with renewed vigor.

Step 4 Pull away or cut off any yellow or brown leaves, or any old flowers - this is normal.

Step 5 Transplant into the garden or containers as soon as evening temperatures stay above 40F. Dig holes the width of the root ball and deep enough so that the original top of the soil is flush with the new soil line. Water the new location before and after planting your plant. This will help the young roots stay hydrated. Once you've placed your plant in the hole, fill in the rest of the hole with extra soil or potting mix, ensuring the entire root system is covered with soil.
