

Tips for Success

Water your plants immediately after taking them out of the box. Give them enough water so that the soil appears damp and water trickles out the bottom of the pot.

Time to Plant! Select a location in a moist, well-drained, sunny location.

For best results, this plant needs to receive a minimum of 6 hours of sun a day. It is adaptable to all soil types with varying pH levels.

While pruning is not necessary, you will see good results by removing the oldest stems every 3-5 years to encourage vigorous juvenile growth.

We aren't happy if you aren't happy. If you have any questions regarding your order please call us at **1-765-525-4065** during the hours of 8:30 am and 4:30 pm EST.

You can email questions to us at: customerservice@robertasinc.com.

If your bulbs, cuttings, etc. do not sprout, or your plant dies within one year from the date of shipment, we will send you a replacement free of charge. We cannot accept responsibility for losses due to extreme weather or neglect. Simply call us at the above toll tree number or fill out the plant replacement form on our website at RobertasUniqueGardens.com.

Roberta's will replace it with a similar or comparable plant at no charge. If your replacement is not available or it is too late in the season to ship, it will ship the following year.

Perennials

Quick Reference

 **Plant Type:** Perennial

 **Light/Sun:** Full Sun

 **Mature Height:** 2'-3'

 **Mature Spread:** 4'-5'

 **Bloom Time:** Spring on old wood

 **USDA Hardiness Zones:** 4 to 8

Plant Caretaking

Upon Arrival: Please take plants out of the box immediately and remove any shipping materials from around the plants. Give them some water and place them in a warm sunny area for 1-2 days before replanting.

Planting Depth & Spacing: Dig a hole as deep as and 2-3 times the width of your root ball. Plant in a sunny location 3 to 4 feet apart.

Soil: Prefers moist, well-drained soils, but is fairly adaptable to other type of soils.

Watering: Your newly planted shrub will need constant water until they are established. After that, you probably won't have to water unless it is an unusually dry season.

Fertilizer: Use Roberta's Bounty when planting and in the early spring.

Pruning: If needed, prune immediately after the spring bloom.

Pet Considerations: Ensure your pets do not consume plants.

Planting Steps

Step 1 Remove plants from their box and take off other packing materials. Open your box outside or somewhere you don't mind getting messy, as some of the soil may have been shaken loose in transit.

Step 2 Check if your plant is thirsty. They probably need a nice drink of water after their voyage. If the plant feels light or the soil is dry to the touch, give your plants a watering.

Step 3 Allow your plants time to adjust to their new home before re-planting by placing them in a warm sunny spot for 1-2 days. Then they will be ready for re-planting with renewed vigor.

Step 4 Pull away or cut off any yellow or brown leaves, or any old flowers – this is normal.

Step 5 Transplant into the garden.
